SUMMARY

Lulusan baru S1 Informatika yang berdomisili di Sleman, dengan spesialisasi di bidang Data Analyst dan Data Science. Memiliki pemahaman mendalam dalam pengelolaan data, analisis statistik, proses Data Cleansing, serta transformasi data operasional. Mahir mengoperasikan Python, SQL, Tableau, dan Power BI untuk menyusun dasbor visualisasi interaktif. Tertarik untuk mengikuti program magang guna menerapkan kemampuan teknis dan membantu perusahaan mengambil keputusan bisnis berbasis data.

EDUCATION

Universitas Amikom Yogyakarta | Informatics Engineering | GPA: 3.49/4.00

August 2022 - July 2026

EXPERIENCE

Bootcamp Participant – Java Spring Boot & Angular | Berjalan

April 2026 - May 2026

- Completed an intensive fullstack engineering bootcamp organized in collaboration with Astra Pay, with mentorship from the Astra Pay engineering team.
- Learned backend system design concepts such as transaction consistency, locking strategies, observability, and database engineering in fintech case studies.
- Developed core e-wallet features including top-up, payment, and transaction history using Spring Boot and Angular.
- Implemented idempotency keys to reduce duplicate transaction processing and applied pessimistic locking for safer concurrent balance updates.
- Integrated structured logging for transaction monitoring and debugging.

Freelance Fullstack Developer | PT Indi Teknokreasi Internasional

February 2026 - April 2026

Project : MyPertamina Gamification (Ramadan Edition)

- Developed the Ramadan edition gamification feature on the MyPertamina app using Next.js, including the implementation of a card game quiz and a popup exchange point with a specific time-restricted access system.
- Integrated RESTful APIs for real-time quiz leaderboard synchronization during the campaign period and configured Google Analytics for user interaction tracking.

Project: Faculty of Earth Sciences and Technology (FITB) ITB Website

- Completed the final phase of development and User Acceptance Testing (UAT) adjustments using Django and React.
- Enhanced User Experience (UX) on the CMS by implementing inline validation, standardized error handling, required field indicators, and data category alignment with the backend.
- Implemented and optimized the interactive 3D Visual Globe feature on the frontend to run smoothly without bugs using Three.js.

Fullstack Developer Intern | PT Indi Teknokreasi Internasional

August 2025 - December 2025

- Collaborated with Product Owners, Backend Developers, UI/UX Designers, and Game Developers to build interactive webview interfaces for MyPertamina's gamification features using Next.js, utilized by thousands of active users.

- Integrated real-time RESTful APIs and implemented anti-cheat interface protection to maintain scoring accuracy in the leaderboard system.
- Built a data distribution pipeline from Golang services to the frontend for the HR management system, enhancing data visualization responsiveness and facilitating real-time employee data verification.
- Designed new API endpoints using Golang and a Data Seeder feature to increase the efficiency of self-assessment feature testing by 40%.
- Completed system maintenance and bug fixes for the Regional Commodity CMS (Central Kalimantan Government) built with Django, ensuring the operational stability of the admin panel.
- Implemented image compression in the Summernote text editor, saving server storage capacity by up to 60% without significantly compromising visual quality.

Independent Study - Fullstack Development | Software University

August 2024 - December 2024

- Completed an intensive modern Python ecosystem program with a final average score of 92/100, focusing on comprehensive web architecture design.
- Applied Object-Oriented Programming (OOP) principles through the Django framework, PostgreSQL database management, and dynamic frontend processing using HTML, CSS, and JavaScript.
- Developed an end-to-end fullstack project independently, from ORM-based data structure design to responsive web interface implementation.

SKILLS

- **Core Technical Skills:** Data Cleansing, Data Transformation (ETL), Statistical Data Analysis, Database Management, System Design Fundamentals.
- **Tools & Platforms :** Java Spring Boot, Angular, Golang, Three.js, Laravel.
- **Programming & Databases:** Git, Postman, MySql, Vercel.
- **Engineering Concepts :** RESTful API Integration, Refactoring, System Design Fundamentals, Observability & Logging.
- **Soft Skills :** Problem-Solving, Team Collaboration, Effective Communication, Adaptability.
